

Have you heard about Chronic Care Management? Exciting Announcement...

CDS
CHRONIC DISEASE SOLUTIONS

Weems Medical Center West Apalachicola has partnered with Chronic Disease Solutions!

The Chronic Disease Solutions' Team will be assisting our office in providing care to help make our patients lives healthier and more comfortable.

Want a little more information?

Chronic Care Management is a service provided by nurses and trained care coordinators with the goal of improving patient outcomes and patient satisfaction. Below are just some of the benefits you will receive:

- Improved quality of health with a reduction to the cost for health care services;
- Coordination of care with community and home based clinical service providers, such as durable medical equipment, nutrition services, outpatient therapies, transportation services, etc.;
- Assistance with care transition between the health care providers, hospitals, specialty clinics, surgery centers, etc.;
- Follow-up care coordination after: ER visits, hospital discharges, nursing homes, and other facilities;
- Cost effective measures for medications as well as evaluate the effectiveness of medications;
- A comprehensive care plan for health issues in regards to cognitive, functional, physical, psychosocial, and environmental assessment;
- 24/7 access to care coordination services

What would be *your* responsibility as the patient?

- Agree to a minimum of 20 minutes non-face-to-face care coordination;
- Adhere to the copay and deductible for monthly services; and
- Make available your current medications to be discussed during your phone appointment.
